3.2 Participatory Catchment Conservation

i. Establishment of Fuel Wood Plantation

The Authority has also implemented participatory catchment conservation in order to protect the catchment of the Ewaso Ng'iro North River Basin by reducing pressure on the forest for fuel wood and poles through establishment of community woodlots and rehabilitation of degraded forest areas. This entailed the distribution of 5,000 Indigenous and 50,000 Exotic Tree Seedlings to groups and institutions in Wajir County.

ii. Promotion of Non Wood Extractive Activities

In order to promote income generation for the local communities without destruction of forests the Authority undertook to promote beekeeping in the entire basin. This entailed training and supply of beehives to several identified groups. The Authority has distributed 150 Langstoth beehives to several beekeeping groups in Wajir County.

The Authority has set up a gums and resins processing plant in Wajir to add value to these abundant resources.

3.3 Capacity Building

The Authority has also undertaken several for Water Resources Users Associations, trainings on water management, beekeeping, gums and resins production, Agro forestry and participatory forest management among others
